Rawhide Dog Bones

What do dogs love to chew on, have a hard time giving up, and love to bury in the yard? There is a simple answer that every dog owner knows. Dogs love **rawhide dog bones** as much as they love to romp and play. Dogs are known for their love of bones, a love captured in cartoons, movies, and television. Dogs get as much enjoyment in playing with a large bone, as puppies get with a small bone. They can chew to their heart's content and the fun doesn't stop there. Once done chewing, a dog bone becomes a play toy, which is often placed in a hole, buried in dirt and saved for another day of chewing and playing.

A very important part of the development of a gentle dog is to have the proper sized **Dog leash & collar**. As your puppy grows you will need a collar that will adjust with his size. At **petsupplyfactory** you will find the **belt buckle style dog collar**, which we recommend this for larger breeds. For smaller breeds we would recommend one of our **adjustable dog collars**. All of our dog collars are designed keeping in mind the nature and comfort of your dog.

Dogs of nearly all breeds feel alike when it comes to their freedom. They like to explore their surroundings. They want to make sure they have explored every nook and cranny to ensure a secure environment.

Dogs will often pull or chew at their leash, especially in their early development when they experience it for the first time. They loath a leash as they feel lack of independence. However, if a collar and leash is used properly and is a comfortable fit for your dog, they will eventually adjust to its use (with proper training).

Dog leashes help in controlling your pet in public places and on roads with heavy traffic. Dogs often have an instinct to chase other animals. A dog leash helps in controlling the pet when starting what is considered a fun activity. Consider the following important features while selecting the dog leash for your pet:

- ◆ Must be made of a durable material.

- ◆ Must be of proper length to allow for proper control.
- ◆ Must be sturdy so that your pet's safety is not compromised.

Often times dog owners do not like to use leashes on their dogs. However, an owner should understand that dog leashes are helpful in proper development of a well behaved dog. Dog leashes are particularly helpful in the slight pulling back of an untrained dog in the following situations:

- ◆ When another dog or pack of dogs threatens your pooch.
- ◆ When your dog, on sighting a wild animal, becomes uncontrollable.
- ◆ When your dog becomes ambitious.
- ◆ When your dog ventures into an area where it should not.
- ◆ When you need to teach your dog to respect its boundaries and that of others.

Leashes are also helpful in letting your dog know, 'Who's the Boss', during its initial days of training. Our **dog leashes** offer your dog the comfort the control necessary for a happy medium. The proper leash will keep your dog safe and will assist you in the proper training of a well behaved dog.

At **PetSupplyFactory.com**, you will find a large selection of accessories and products for your pup. Included in this product line are Dog Leashes, Dog collars, designer Dog Leashes and more.

Your dog is your best friend, but a dog collar is your pet's best friend. **Dog collars and leashes** are not just canine fashion statement, but a very important pet accessory. Dog collars are used to attach identification tags, which are helpful in identifying your pet.

CHOOSE THE BEST COLLARS FOR YOUR CANINE

A **Dog collar** is a very important accessory and care should be taken while choosing the right one for you precious pet. Keep in mind the following considerations when you are selecting a dog collar for your pet dog.

- ◆ **Size-** The dog collar should have the perfect fit. It should be of the right size, not too loose and not too tight. A good rule of thumb is to be able to fit two fingers sideways between the collar and you dogs neck. Your pet will escape out of a loose collar, while a tight dog collar will cause discomfort to you favorite pet.
- ◆ **Durability**
- ◆ **Safety** – Safety stretch cat collars or breakaway cat collars should be used on your cat or feline. This will keep them from being injured if they are to get their cat collar caught on a tree or fence post.
- ◆ **Choose a dog collar with a pattern**
Dog collars with a distinguishing pattern help in identifying the dog in case he is lost.
- ◆ **For puppies soft and thin collars are better**
A soft nylon collar or a thin leather collar is perfect, as it will not hurt the pet.
- ◆ **For big and strong dogs wide and heavier collars are best**
- ◆ **Martingale dog collars**
A martingale collar, otherwise known as a Sighthound collar or greyhound collar are loose on the dogs neck when standing still and becomes tight when pulled. It acts as a choke chain, but is very gentle on the dog neck since it is made with nylon collar webbing rather than metal chain.
